

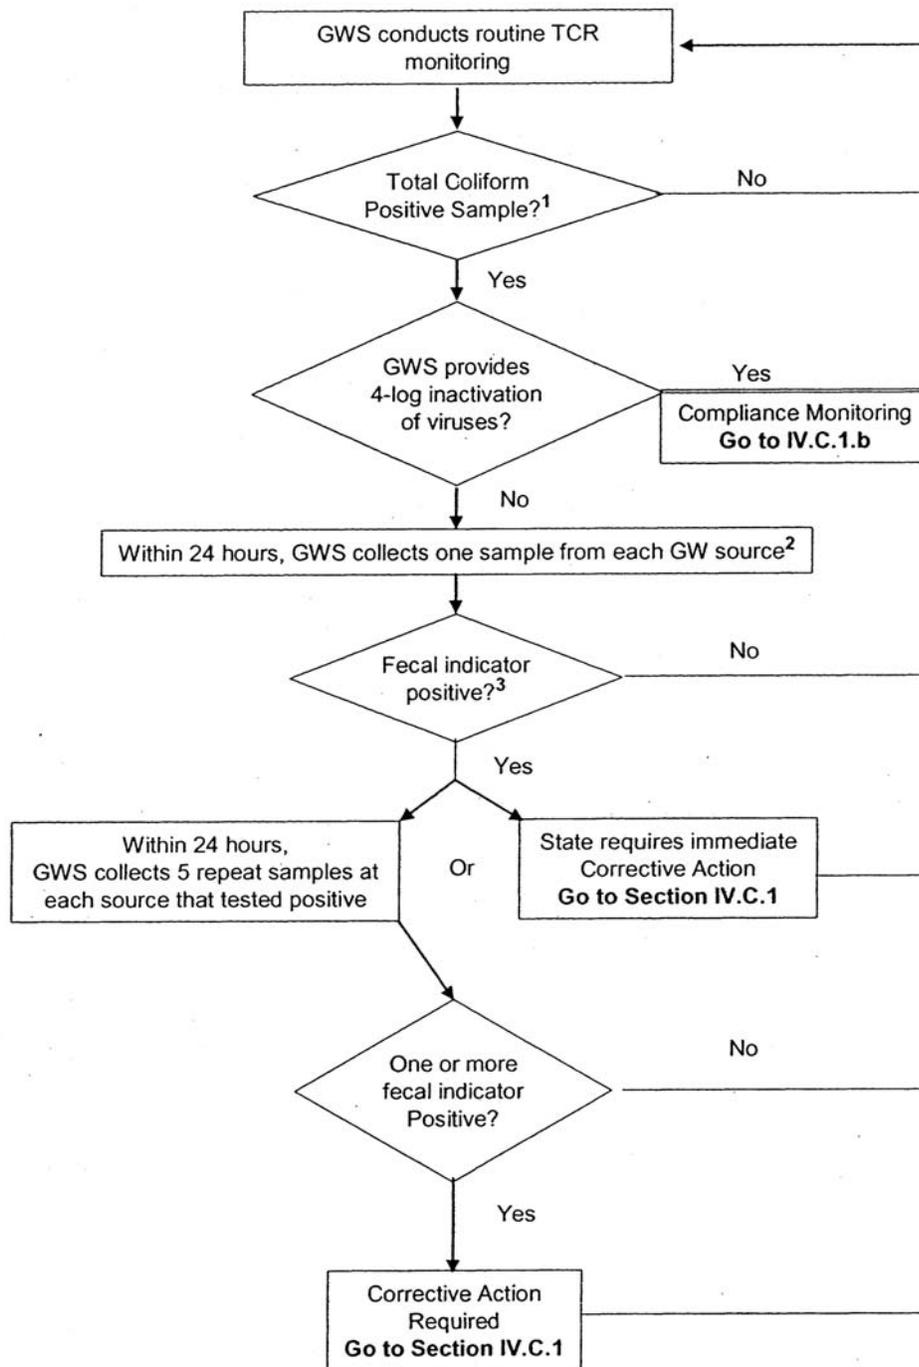

Figure IV-2: Triggered Source Water Monitoring Requirements

¹Answer "no" if the sample is invalidated under 141.21(c) or the State determines that the cause of the total coliform-positive sample directly relates to the distribution system

²If approved by the State, systems with more than one ground water source may monitor at representative ground water source(s) according to a triggered source water monitoring plan

³*E. coli*, enterococci, or coliphage
